

Student Voices: Using the Cal State Apply Course Import Transcript

Narrator: Student Voices: Using the Cal State Apply Course Import. Speaker: Ana Castillo, UC San Diego.

Ana: The application process for me was really easy in terms of applying to colleges, especially with the CSUs and the UCs because everything was in one place, and I did not have to go look at all over the internet to find websites that I didn't know the names to because everything was in CaliforniaColleges.edu through my account.

Narrator: Speaker: Sara Chen, UC San Diego.

Sara: I did apply to colleges through CaliforniaColleges.edu. It was very simple since I only applied to colleges in California.

Narrator: CaliforniaColleges.edu is shown with a user navigating to College and Launch from CaliforniaColleges.edu. The California Community Colleges, California State University, and the University of California applications are available for selection.

Sara: All the links to all the like the UC application and the CSC applications, they were all in one spot. So I could easily go between either one. And also since I input my information into like the website, it automatically inputted it into that, CSU application. So it made the overall application process very easy.
