

Student Voices: Using the Career Search Tool Transcript

Narrator: Student Voices: Using the Career Search Tool. Speaker: Kristal Roman, UC Berkeley.

Kristal: For me, when I was navigating my career search and using like specifically the career search tool, I appreciated that it referenced the tasks that you would be doing as like that specific occupation

Narrator: A career page is shown, which includes work activities and responsibilities related careers, academic knowledge, education level, and salary, and potential growth.

Kristal: I liked that for some of them it mentioned like these are majors or areas of studies that would correspond with like the specific career choice

Narrator: Speaker: Citlalic McCoy. CSU, San Marcos.

Citlalic: The career search tool honestly helped me eliminate other career options. I'm a person with a lot of interests and I never know where to put my time or like where to like distribute my time or my energy into correctly. So when the first couple were like lawyer, lawyer, I was like, okay, I know what I need to focus on.
