

How CaliforniaColleges.edu Helped Me Plan For, Apply To, and Pay For College

Narrator: CaliforniaColleges.edu. Discover. Plan. Launch. How CaliforniaColleges.edu helped me plan for, apply to, and pay for college. J.C. Andrade and Katrina Cating, Heritage High School, class of 2022.

Jesus: I'm J.C, I am in 12th grade, and I go to Heritage High School. In college, I hope to study biochem.

Katrina: I'm Katrina Cating, I'm also in 12th grade. In college, I hope to study either nursing or biomedical engineering. I use California Colleges for everything college related. It was what I used to find my interests and my major.

Jesus: The biggest value would have to be the career quiz. It labeled every career that fits. That made me want to major in biochem because of all the careers that were listed from it.

Katrina: So using California Colleges to figure out my A through G courses was very easy, so it would keep me on track for what I needed to finish for high school and what I needed for college.

Jesus: I have used California Colleges by accessing my college applications like California State Universities and the University of California applications and FAFSA.

Katrina: It made it easier because all of the applications were just listed on one tab.

Jesus: Having everything in one website, just click to the California State University applications, to the University of California applications. They were right there and easy.

Katrina: Also, it was able to let us download all of our transcripts into our application for CSUs.

Jesus: The financial aid portion was very convenient.

Narrator: A FAFSA checklist is shown on CaliforniaColleges.edu, with sections that include student information and documents, as well as parent information and documents needed.

Jesus: Since my parents have never filled out a FAFSA form before, it made it really

easy for me and my parents to understand, just go step by step, and look what we need to get done.

Katrina: Using the financial aid lessons, made applying simple because everything that you needed to do was listed and it helped me and my mom figure out what I needed to do.

Jesus: The checklist was really helpful. It just labeled everything that we needed to get done. Once we got it done, just checked it off and moved on to the next step. It was really convenient.

Katrina: CaliforniaColleges.edu is just like a reality check for everything, that you do have a future and then you need to prepare for that if you are choosing to take the path of going to college and it provides everything for you if you are trying to go to college
